## **FARBEN SHINE ENZYME H**

### **Concentrated Enzyme for Use In An Acid Medium**

**Appearance** : White fine powder packed in small bags of 1 kg. each one.

**Characteristics** : Mixture of various proteolytic enzymes, activating agents and inert supports.

### **PROPERTIES AND APPLICATION:**

-It is suitable for leather treatment in an acid medium for example pickled skins, wet blue etc...

-It eliminates insufficient soaked, limed or bated zones in the skins.

-It imparts an excellent degree of softness to the leathers structure, by hydrolysing fiber substances, particularly very compact goatskins.

-It eliminates chrome stains, uniforming their distribution.

### **Recommended usage rates:**

Depend upon the treatment method and leather type; 0,5 – 3,0 % (on shaved weight)

The bath pH=5,0 – 6,0

The bath temperature =50 – 60 °C

In pickle and fur-suede application                      1,0 – 1,5 g/L

### **STORAGE :**

In a cool and dry place in original packaging, can be stored for a period of one year. Product must be protected from excessive heat and cold.

### **PACKAGING :**

1 kg plastic drum.
